

Gui::Panel::Panel

Gui::WindowClosePopUpMenu
::WindowClosePopUpMenu

Gui::Panel::setOutlineThickness

```
graph LR; A[Gui::Panel::Panel] --> C[Gui::Panel::setOutlineThickness]; B[Gui::WindowClosePopUpMenu::WindowClosePopUpMenu] --> C;
```

The diagram illustrates a relationship where two different classes or methods point to a common target. On the left, there are two rectangular boxes. The top box contains the text 'Gui::Panel::Panel'. The bottom box contains the text 'Gui::WindowClosePopUpMenu' followed by '::WindowClosePopUpMenu' on a second line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the left side of a third box on the right. The arrow from the bottom box also points to the left side of the same third box. This third box is rectangular and has a light gray fill, containing the text 'Gui::Panel::setOutlineThickness'.
